EXP 9: AI AND ANALYTICS USING ZIA IN ZOHO CREATOR

AIM

To use Zia, the AI assistant of Zoho Creator, in the Library Book Issue Management application to analyze the book request text of the Book Issue Request form using Sentiment Analysis and Keyword Extraction, and to view the results in reports.

PROCEDURE

1. Open the **Library Book Issue Management** application, click **Edit this application** and open the **Book Issue Request** form in the form builder.
2. In the field palette, scroll to the **AI Fields** section (Prediction, Keyword Extraction, Sentiment Analysis, OCR, Object Detection).
3. Drag **Sentiment Analysis** and **Keyword Extraction** onto the form and name the fields **Sentiment** and **Keyword**.
4. In Field Properties, select the **Source Field** whose text Zia should analyze (the book title and request details) and click **Done** to save the form.
5. Click **Access this application**, open the Book Issue Request form, enter the sample data including the book title and click **Submit**.
6. Zia analyzes the text and fills the Sentiment field (Positive, Neutral or Negative) and the Keyword field with the important words.
7. Open the report (Issue_Requests_Spreadsheet) and view the Keyword and Sentiment columns for the submitted records.

OUTPUT SCREENSHOTS

RESULT

Zia AI was successfully used in the Library Book Issue Management application. The Sentiment Analysis and Keyword Extraction fields automatically analyzed the book request text on form submission, and the sentiment and keywords were displayed in the form and in the report.
