EXP 4: DATA MODELING AND FORM BUILDER FOR LIBRARY BOOK ISSUE SYSTEM

AIM

To design the data model and build a form using a low-code platform (Zoho Creator) for a Library Book Issue Management application, so that members can request books and the requests can be stored, viewed and tracked.

PROCEDURE

1. Log in to Zoho Creator and create a new application named **Library Book Issue Management**.
2. Create a form named **Book Issue Request** to act as the data model for storing book issue records.
3. Add Member Details fields: Name (First/Last), Register/Roll Number and Member Type (student/faculty).
4. Add Contact Details fields: Email Address, Contact Number and Address (with city, state, postal code and country).
5. Add Book Request Details fields: Book Category, Subject Areas of Interest, Number of Copies, Purpose of Borrowing and Issue Status.
6. Add scheduling fields: Preferred Issue Date, Collection Date, Preferred Collection Time and the Agree to Library Rules checkbox.
7. Add catalog and media fields: Image, URL, Book Replacement Price, Faculty Recommendation Upload, Book Review Video and Voice Note.
8. Add Home Delivery, Fine Amount Due and Late Fee Waiver Percent fields, plus a Library Rules Display rich-text field.
9. Add Signature and Request Submitted On (system-generated) fields, and mark the required fields as mandatory.
10. Create reports and views: All_Issue_Requests_List, Spreadsheet, Kanban, Calendar, Pivot, Chart and Member-wise History Report.
11. Open the application in access mode, fill in the form with sample data and click Submit.
12. Open All_Issue_Requests_List and verify that the submitted record appears.

OUTPUT SCREENSHOTS

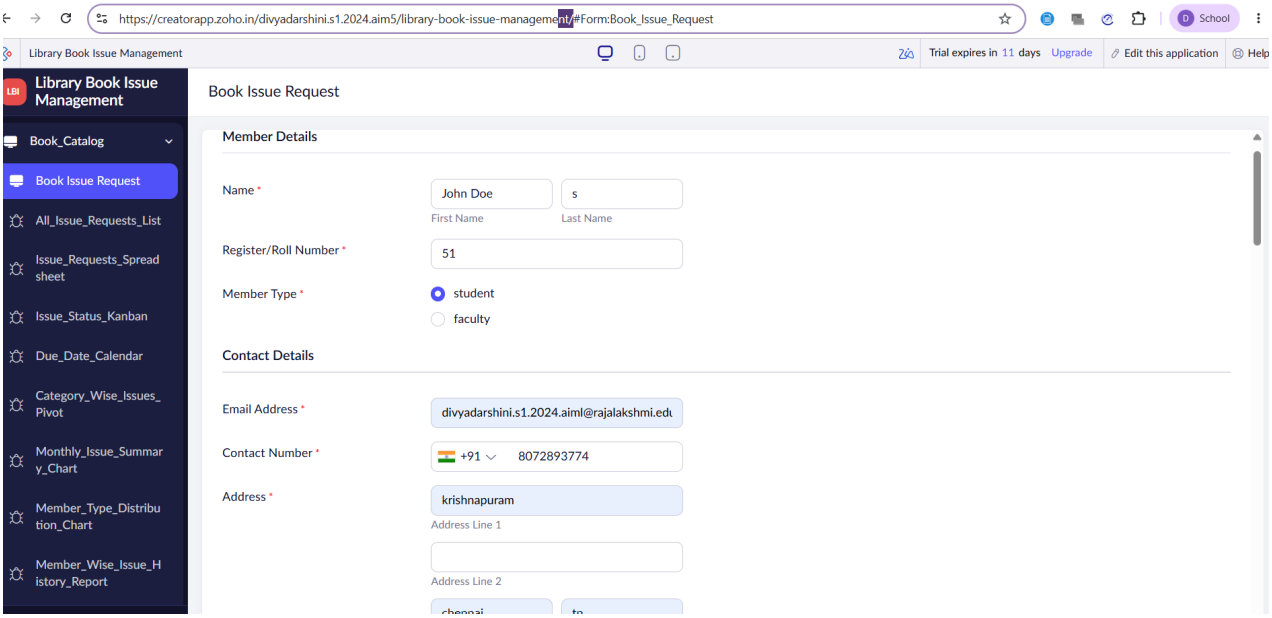

Fig 4.1: Book Issue Request form - Member Details and Contact Details sections

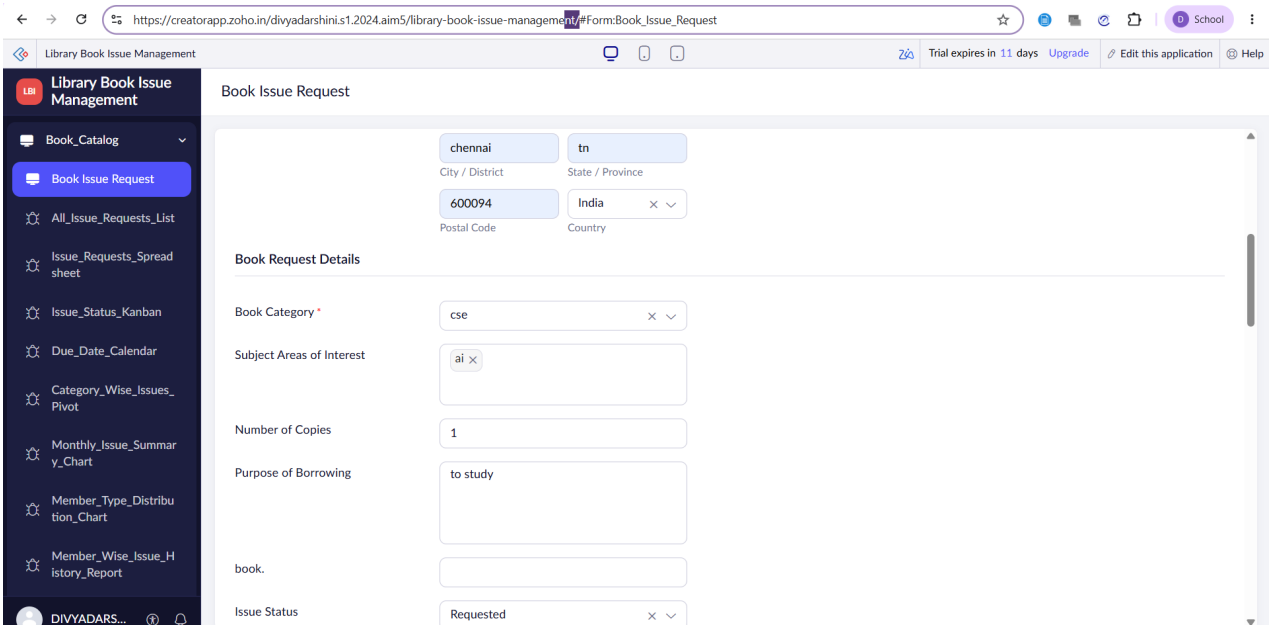

Fig 4.2: Address fields and Book Request Details section

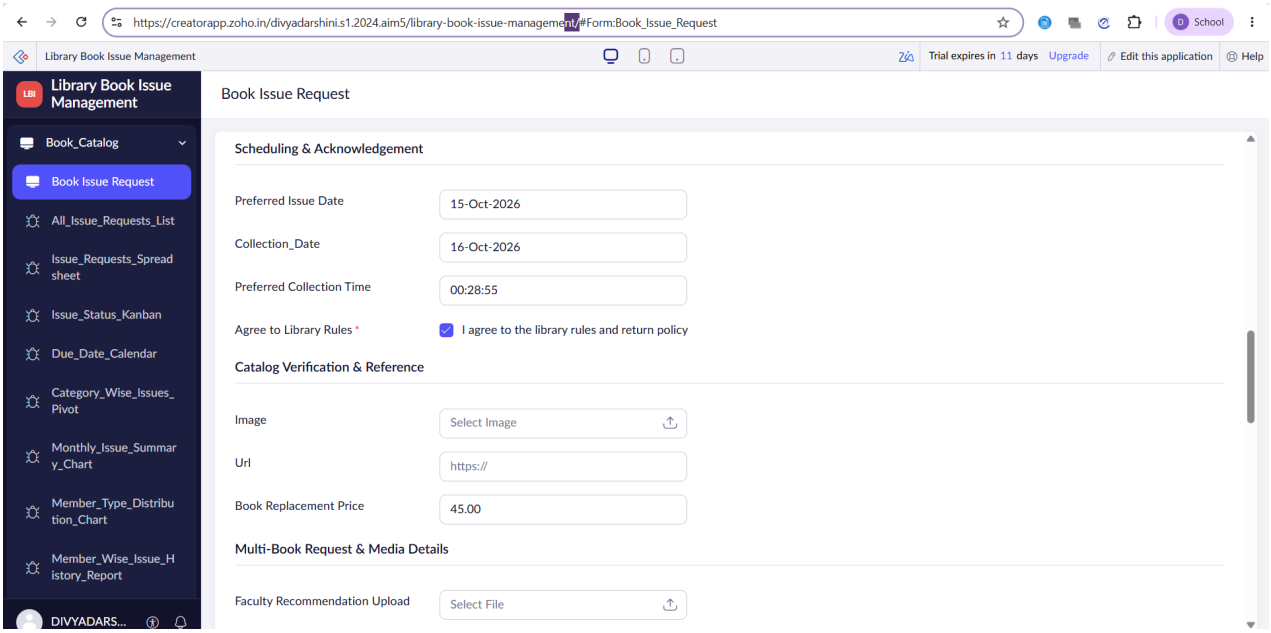

Fig 4.3: Scheduling & Acknowledgement and Catalog Verification sections

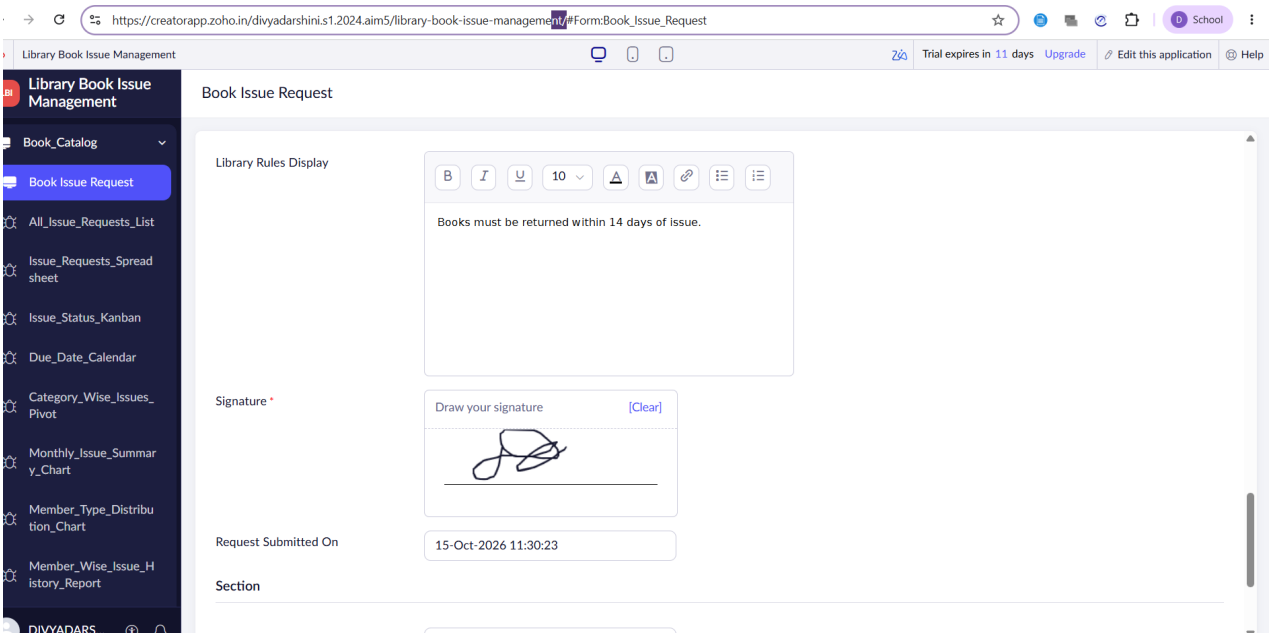

Fig 4.5: Library Rules Display, Signature and Request Submitted On fields

Fig 4.6: Output - All_Issue_Requests_List report showing the submitted record

RESULT

The data model and form for the Library Book Issue System were successfully designed and built in Zoho Creator. A sample book issue request was submitted through the form and the record was displayed correctly in the All_Issue_Requests_List report.
