EXP 5: WORKFLOW FOR EMAIL NOTIFICATION IN ZOHO CREATOR

AIM

To create a workflow in Zoho Creator that uses a Deluge script to automatically send an email notification to the member when a Book Issue Request form is successfully submitted.

PROCEDURE

1. Open the **Library Book Issue Management** application in Zoho Creator and click **Edit this application**.
2. Go to the **Workflow** section and click **Create Workflow**.
3. Select **On a form event** as the trigger for the action.
4. Choose the form **Book Issue Request**.
5. Set *Run when a record is* to **Created or Edited**.
6. Set *When to trigger workflow* to **Successful form submission**.
7. Name the workflow **Send_Book_Issued_Notification** and click **Create Workflow**.
8. In the Deluge script editor, add the **sendmail** task with the member's email as the recipient, a subject and a message body (script below).
9. Save the workflow, open the application and submit a new Book Issue Request.
10. Open Gmail and verify that the Book Issue Confirmation email has been received.

Deluge Script

```
sendmail
[
    from : zoho.adminuserid
    to : input.Email
    subject : "Book Issue Confirmation - " + input.Subject_Areas_of_Interest
    message : "Hello " + input.Name.first_name + " " + input.Name.last_name + ",<br><br>"
              + "Your request for <b>" + input.Subject_Areas_of_Interest + "</b> has been processed.<br>"
              + "Return/Collection Date: <b>" + input.Collection_Date + "</b>.<br><br>Thank you!"
]
```

OUTPUT SCREENSHOTS

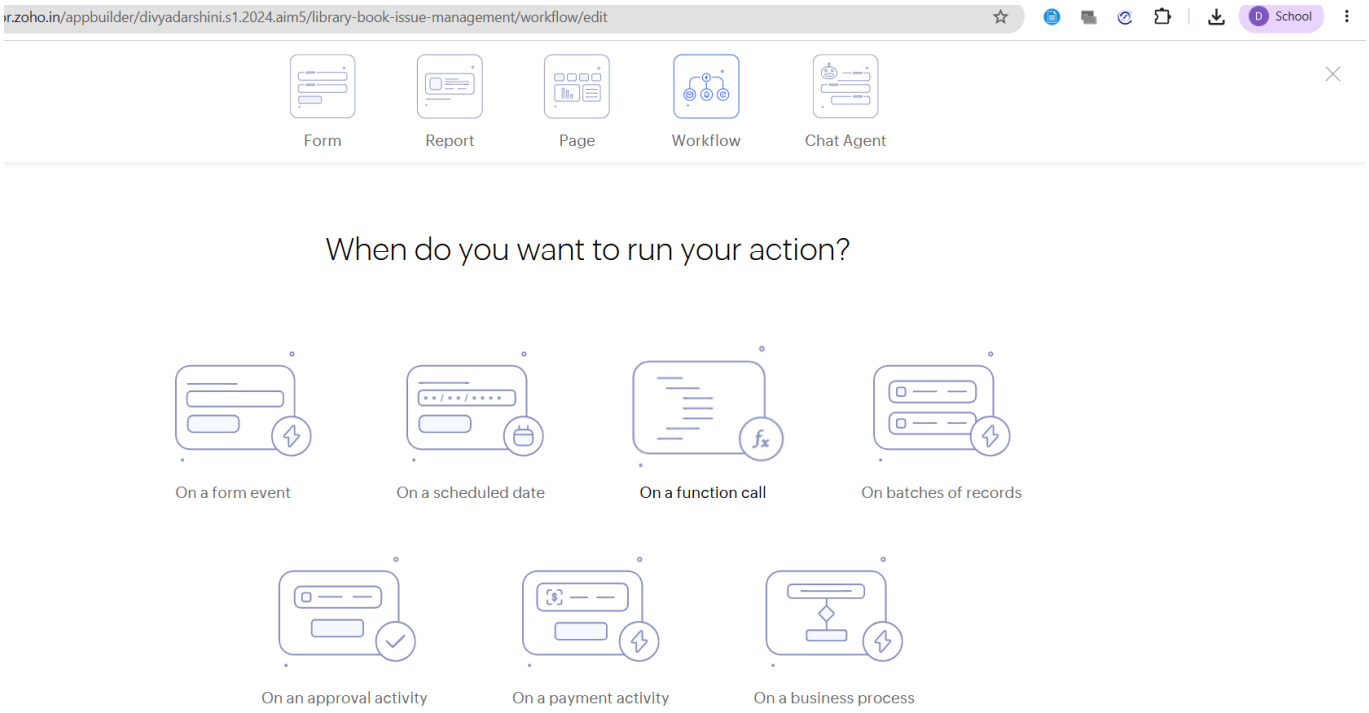

Fig 5.1: Workflow creation - selecting when to run the action (On a form event)

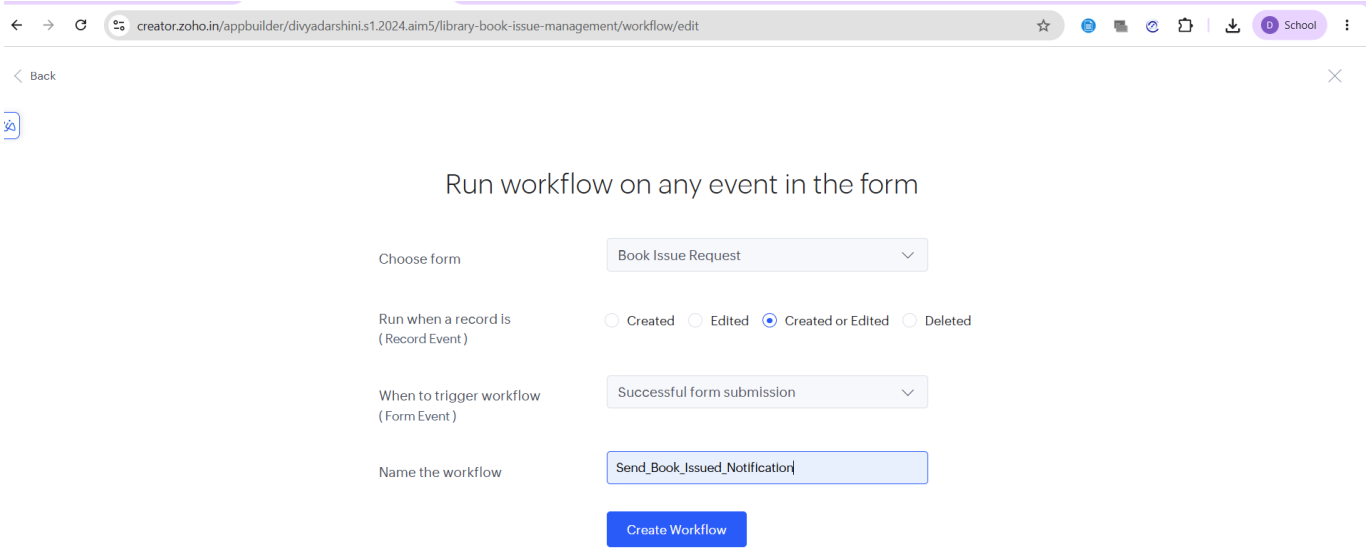

Fig 5.2: Workflow configuration for the Book Issue Request form (Send_Book_Issued_Notification)

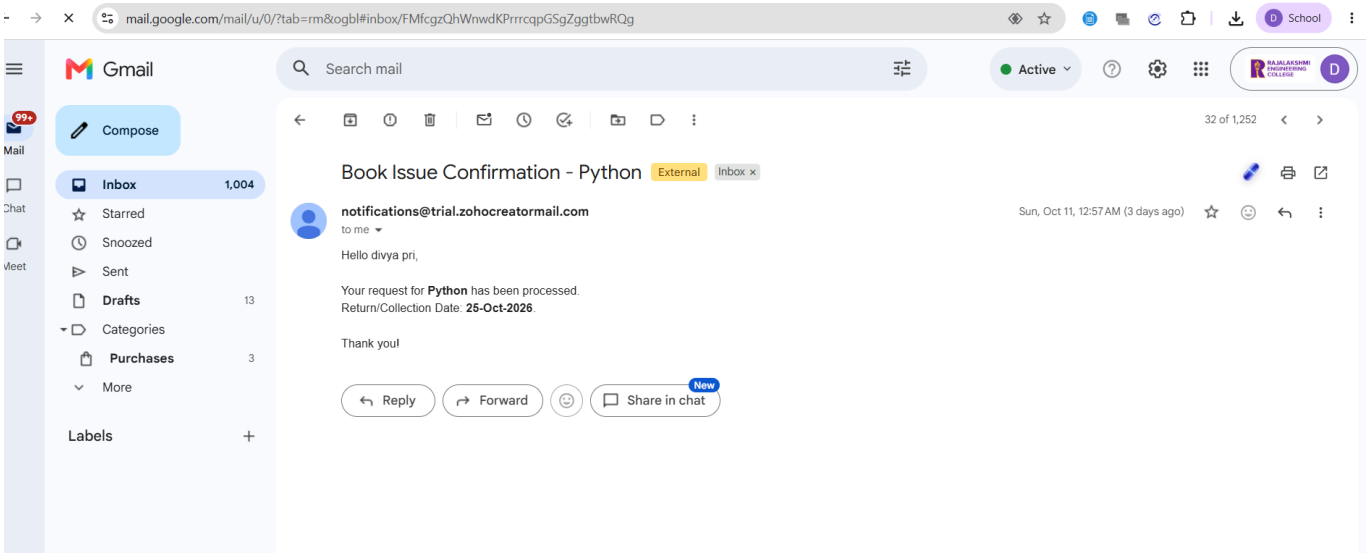

Fig 5.3: Output - Book Issue Confirmation email received in Gmail

RESULT

A workflow was successfully created in Zoho Creator using a Deluge script. On submitting the Book Issue Request form, an email notification (Book Issue Confirmation) was automatically sent to the member and received in the inbox.
