EXP 7: ZOHO CREATOR API INTEGRATION

AIM

To create a workflow in Zoho Creator using a Deluge script that logs the details of a submitted Book Issue Request (record ID, member name and book title) and to verify the output in the log.

PROCEDURE

1. Open the **Library Book Issue Management** application, click **Edit this application** and go to the **Workflow** tab.
2. Click **New Workflow** and choose **On a form event**.
3. Select the form **Book Issue Request**, set the record event to **Created or Edited** and the trigger to **Successful form submission**.
4. Name the workflow **Log_Issue_Request_Details** and click **Create Workflow**.
5. In the Deluge script editor, paste the script given below, then save the workflow.
6. Click **Access this application**, open the Book Issue Request form, enter the data values (Book Category, Book Title, etc.) and click **Submit**.
7. Click **View Log Details** and verify the log messages generated by the workflow.

Deluge Script

```
info "=========================================";
info "NEW BOOK ISSUE REQUEST LOGGED";
info "=========================================";
info "Record ID: " + input.ID;
info "Member Name: " + input.Name;
info "Book Title: " + input.Book_Title;
info "=========================================";
```

OUTPUT SCREENSHOTS

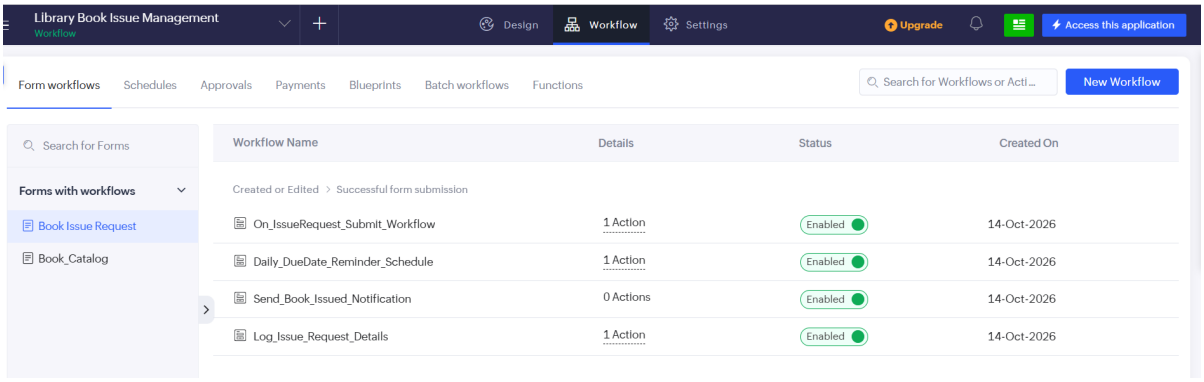

Fig 7.1: Workflow list - Log_Issue_Request_Details created and enabled

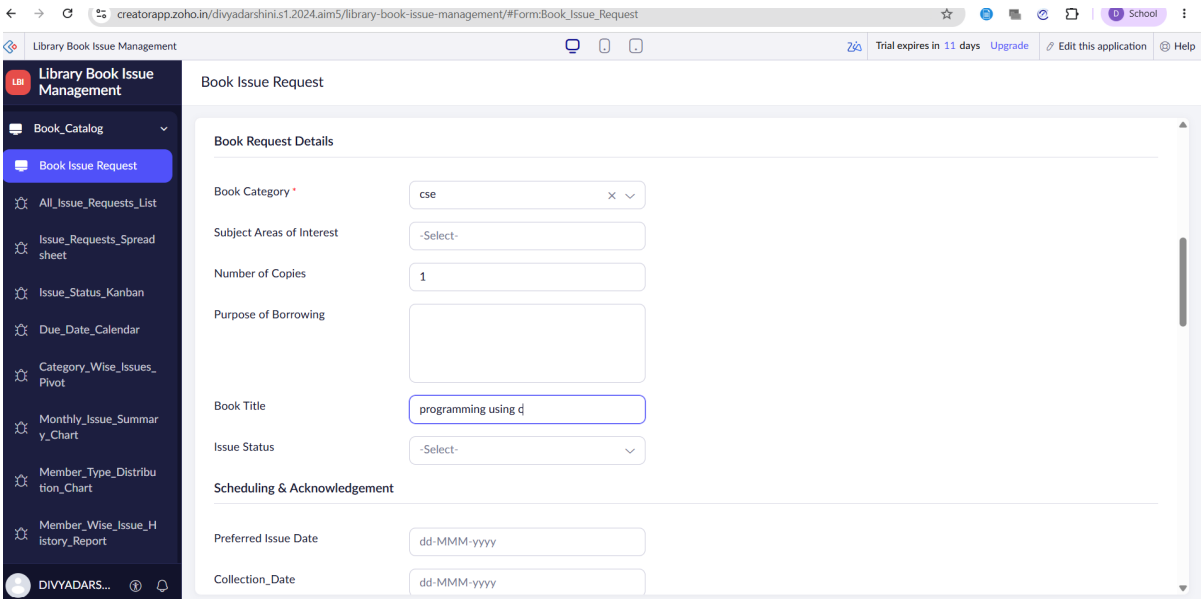

Fig 7.2: Book Issue Request form filled with sample data (Book Title entered)

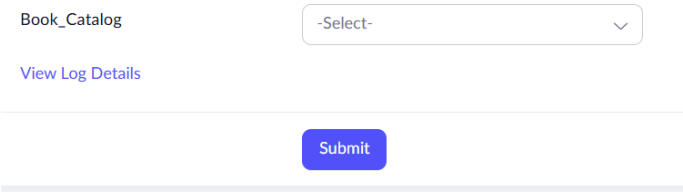

Fig 7.3: Submit button and View Log Details link on the form

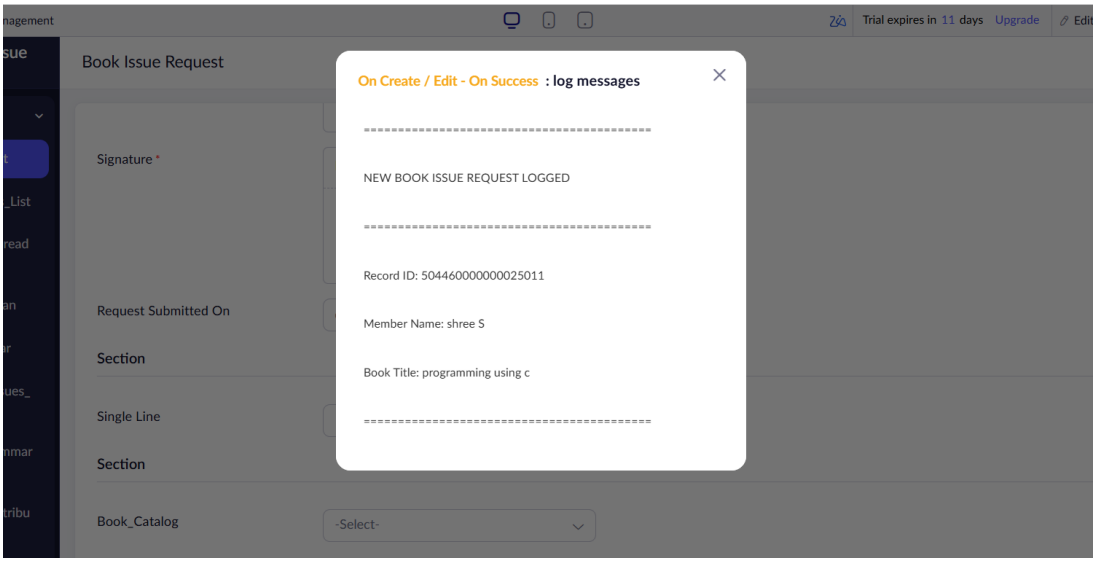

Fig 7.4: Output - Log messages generated by the workflow on successful submission

RESULT

The workflow Log_Issue_Request_Details was successfully created using a Deluge script. On submitting the Book Issue Request form, the record ID, member name and book title were logged and displayed in View Log Details.
