EXPERIMENT 5: REPORTS, DASHBOARDS & UI PAGE BUILDER

AIM:

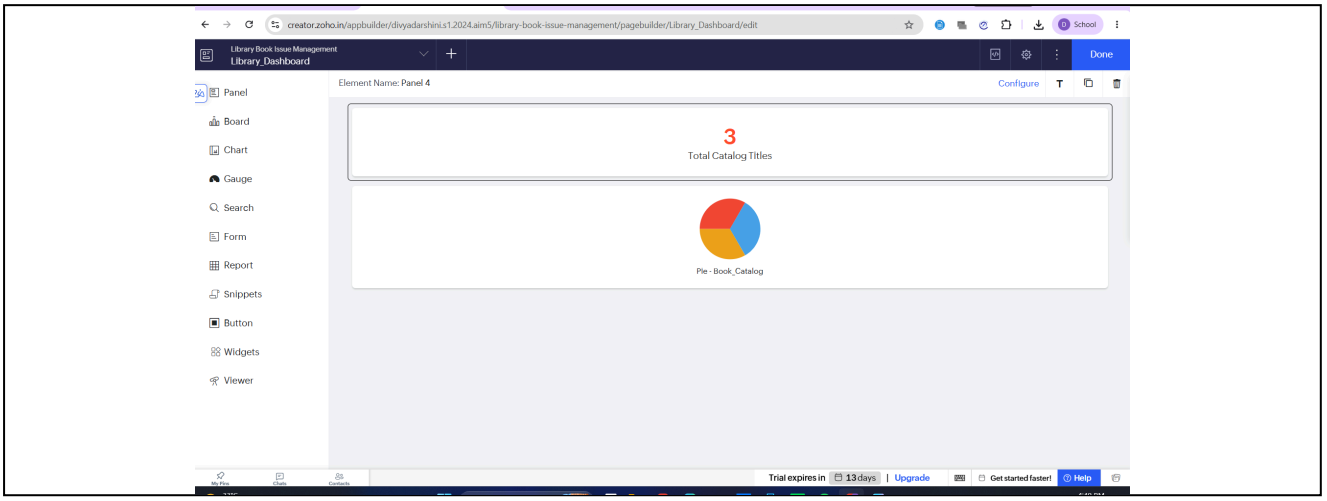

To design dynamic reports, metric analytics cards, and an interactive central administration dashboard using Zoho Creator Page Builder.

PROCEDURE:

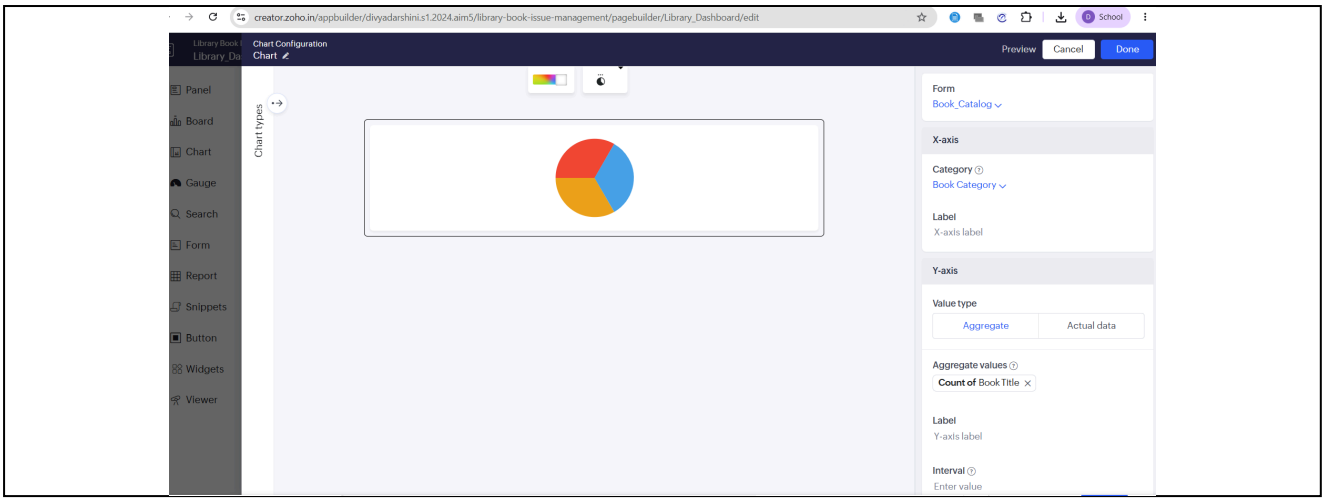

Step 1: Navigate to **Reports** in Zoho Creator, select `Book_Catalog_Report`, and open the **Configure Fields** panel to customize visible columns, order, and field display properties.

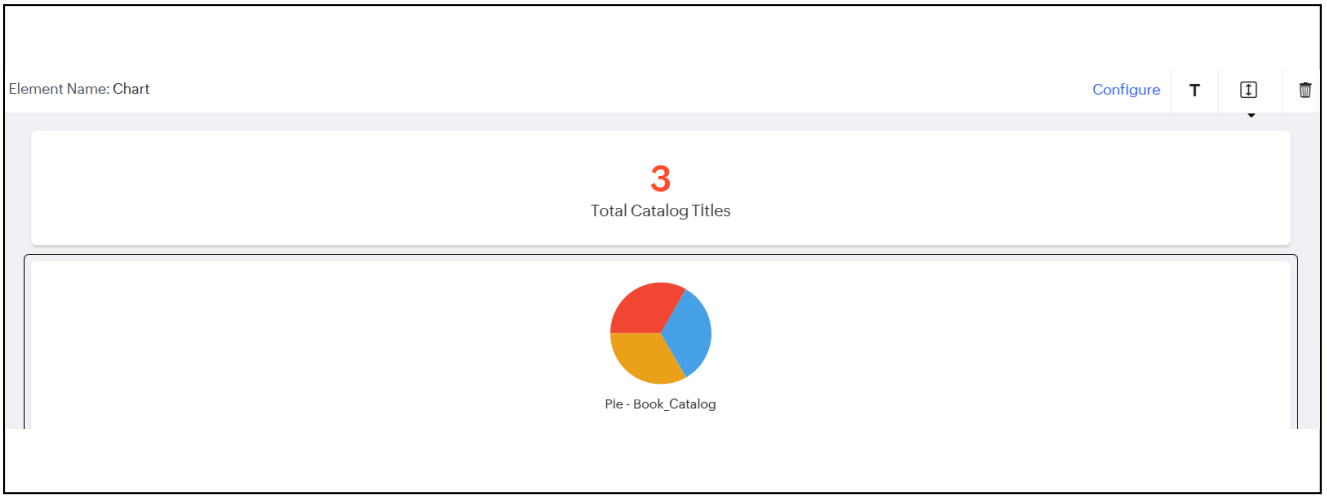

Step 2: Navigate to **Pages** in the App Builder, select `Library_Dashboard`, and launch the Drag-and-Drop Page Builder interface to view the left element panel and dashboard grid canvas.

Step 3: Add an interactive **Chart Widget** to the dashboard canvas, open Chart Configuration, and configure the X-axis category (`Book Category`) and Y-axis aggregate (`Count of Book Title`).

Step 4: Save the layout changes, publish the page, and launch the live `Library_Dashboard` view displaying real-time metric panels and distribution analytics.

RESULT:

Custom reports, stat metrics, and a fully interactive UI Dashboard were successfully constructed and deployed using Zoho Creator Page Builder.
